DZNR-768: BACnet® MS/TP Repeater

Description

The Delta Controls DZNR-768 is an intelligent RS-485 BACnet MS/TP, 4-port network repeater. It has four removable terminals for 2-wire twisted pair connections, or four RJ45 connectors to accommodate the quick connect cabling used with the DZNT-VAV products. The DZNR-768 continuously monitors network traffic and displays status and communications errors on its 118 on-board LEDs.

Features

▶ Can be used with any BACnet MS/TP Network

▶ Divides a network into segments for easy troubleshooting

▶ Supports twisted pair and Delta Controls CAT-5 MS/TP wiring

▶ Uses autobaud detection to remove the need for manual configuration

▶ Displays online or offline status of each controller

▶ Built-in termination for each segment ensures proper network operation

▶ Displays status

▶ Identifies controllers with duplicate addresses

▶ Detects unreliable character transmissions

▶ Identifies network wiring faults

Application

The Delta Controls DZNR-768 divides a RS-485 network into four segments, allowing up to 64 controllers per segment, while improving signal quality on each segment. Built-in diagnostics monitor the status of each controller and detect communications errors on each segment.

Segment 1 typically connects to a System Controller, and the three other segments allow for distribution of the network controllers. The four segments allow for a total of 99 controllers per DZNR network.

The network cable length for each segment is 4000 feet (1200 meters) for twisted pair and 2000 feet (600 meters) using the CAT-5 MS/TP connections.

Specifications (Continued)

Power
24 VAC 50/60 Hz @ 7 VA

Communication Ports
4 RS-485 Ports
BACnet MS/TP up to 76800 bps

Ambient
0º to 55ºC (32º to 131ºF)
10 to 90% RH (non-condensing)

Dimensions
21.8 x 10.7 x 4.9 cm (8⁹⁄₁₆ x 4¼ x 1¹⁵⁄₁₆ in.)
with housing

Weight
190 g (0.41 lb.) with housing

Compliance
CE
FCC
EAC
